

John Miguel Borillo

Software Developer

Toronto, ON 6479795835 johnborillo8@gmail.com Portfolio

Experience

World Vision Canada

Research & Software Developer Intern

September 2024 - September 2025

Mississauga, ON

- Drove cross-team adoption of workflow automations (Power Automate, Power Apps, SharePoint, Freshworks) by leading demos, gathering feedback, and coordinating rollout.
- Launched **AI chatbot (Copilot Studio)** adopted by 20+ staff, reducing internal document search time ~ 30%.
- Led evaluation of **AI platforms (Copilot Studio vs Azure AI)**; presented technical + budget trade-offs to stakeholders and executive leadership.
- Assisted in designing data schema & full-stack mobile features (**React Native, FastAPI, PostgreSQL, Stripe**), delivering an MVP prototype that introduced a capability the organization had not previously supported.

Enjou

Full-Stack Developer Intern

September 2023 - September 2024

Edmonton, AB

- Optimized **Next.js + ChakraUI app**, reducing load time 25% and boosting user engagement and retention.
- Developed RESTful API endpoints (Node.js, Express, Supabase)** that reduced API latency by ~30%, improving app responsiveness.
- Containerized the local development environment** with Docker and automated database migrations, eliminating manual staging updates and saving ~20 engineering hours per sprint.
- Integrated Cypress end-to-end testing**, catching regressions earlier and reducing post-release bug reports.

Microsoft Corporation

Business Program Manager Intern

May 2022 - August 2022

Toronto, ON

- Collaborated with a cross-functional intern team to design a cloud migration solution using **Azure services and Power Apps**, showcasing cost-saving and scalability benefits.
- Developed a prototype** with integrated **AI image detection and chatbot features**, enhancing the business case for cloud adoption.
- Conducted **market research** and delivered a **pitch to senior leadership**, earning recognition for innovative approach and presentation clarity.
- Achieved **Microsoft Azure Fundamentals (AZ-900)** certification.

Living In Christ Church (LINC)

Volunteer Lead, Sound Engineer

November 2016 - Present

Brampton, ON

- Lead weekly worship and technical sound engineering.
- Research and integrate new technologies for live audio production, enhancing sound quality and consistency.
- Mentor youth in music and teamwork, fostering growth and community engagement.

Education

Sheridan College

Software Development & Network Engineering
3.59 GPA

September 2021 - Present

Advanced Diploma

Relevant coursework: Java, OOP, Data Modeling, Networking, AWS, Linux/UNIX, Database Systems & Design, Enterprise Systems, Full-Stack Application Development, Agile Project Management

Projects

mnemo (Next.js, Dexie.js)

PWA that visualizes perceived time via daily novelty tracking; deployed to Vercel.

Website

ElleHacks 2023 Hackathon (MERN + OpenAI API)

Donation platform with AI NGO recommendations; pitched to judges.

https://github.com/johnborillo/ellehacks2023

Filmbase (React, PostgreSQL, Supabase)

Film stock scouting platform with search & filter features (WIP).

GitHub

theracurephysio Marketing Website (Next.js)

Marketing website for a physiotherapy clinic. Implemented standard frontend practices to deliver a clean, user-friendly design.

GitHub

Skills

Languages & Frameworks

Python, Java, JavaScript/TypeScript, React, React Native, Next.js, Angular, Spring Boot, FastAPI, Node.js, Tailwind, Bootstrap, ChakraUI

Cloud & DevOps

Azure, Azure DevOps, AWS, Vercel, Netlify, Docker, GitHub Actions, Supabase, PostgreSQL

Testing & Tools

Cypress, CI/CD, Agile/Scrum, Figma, UI/UX design principles, Microsoft Power Apps, Microsoft Power Automate, Freshworks
